

DINO'S DYNAMOS

Craft

Recycling Collage

A collage is made from lots of bits and pieces stuck down to make up a picture. Make your collage about what the environment means to you, some ideas are given below. First sketch out your picture on some card. After that stick down bits and pieces to give colour and texture. Ideas for where to get bits and pieces are given below.

You will need:

- A large piece of card on which to make the collage.
- Scissors
- Pencil
- PVA or other strong glue

You could use:

- Scraps of coloured paper or newspaper
- Bits and pieces of packaging- (make sure these are clean and have no sharp edges)
- Scraps of material.
- Any other recycled item you fancy!

IDEA! Why not make a picture of yourself in the countryside. You could use real leaves to make the trees look realistic.

DINO'S DYNAMOS

Craft

IDEA!

Used cling film can make a lovely river. How about old wool for multi-coloured sheep!

FACT! Recycling an aluminium can uses less energy than making one from scratch. The energy saved could run a TV for 3 hours, per can.

FACT! For every tonne of recycled paper used you are saving 17 trees.

FACT! Plastic can take up to 500 years to decompose.

IDEA!

Why not make a picture of your favourite animal. Material scraps and wool can be used as fur. Bottle tops make good eyes and noses!

Look out for this symbol on a product - it means you can recycle it.
