

DINO'S DYNAMOS

Craft

Catch a Bird!

You will need:

- A mug to draw around
- Piece of A4 card
- Hole punch
- Piece of string or wool

Step 1. Make two circles on a piece of thin white card, by drawing around a mug twice. Then cut them out.

Step 2. Draw a bird on one circle and a cage on the other. Then turn the cage upside down and glue them together back to back.

Step 3. Use a hole puncher to make two holes on either side of the cage. Cut two pieces of this string as long as your arm.

DINO'S DYNAMOS

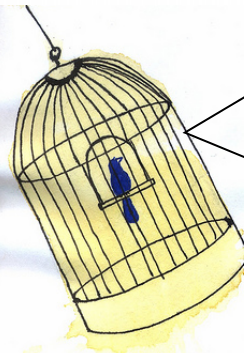

Craft

Catch a Bird...

Step 4. Thread a piece of string through one pair of holes. Tie a knot in both ends and then do the same on the other side.

Step 5. Hold the knots so that the circle hangs down. Flip the circle over and around until the string is twisted up tightly.

Step 6. Now with both hands, pull the string tight. This makes the circle spin around really fast. What do you see as it spins?

FACT! This toy is called a Thaumatrope and it dates back to Victorian times.

That's over a hundred years ago. That's one toy that never goes out of style!
